

# GEMINI™

The modern solution for jewelers™

## Take your jewelry business to the next level with GEMINI®

IMAGINE a true Windows system designed specifically for jewelry retailers and wholesalers using the latest Microsoft SQL Server technology, with ease of use and the tools to help you plan and grow your business.

GEMINI® is a complete jewelry management system for single or multi-location environments. It has a depth of functionality, security, and stability that is unprecedented in the industry. Controlling your inventory has never been easier and more accurate. Customer information is at your fingertips. Point of Sale is easy to learn and to use.

The screenshot displays the GEMINI software interface. On the left is the main menu with categories like Sales Basic, Sales Extras, Daily, Workshop, Items, Customer, Inquiry, Purchasing, and Memo. The central area shows a dashboard with a globe and MPI logo, and fields for 'Your Name & Logo' and 'YourTown,State'. On the right is the 'Point-of-Sale Entry' window, which includes customer information (Mrs. Evelyn Johnson), shipping information (Mr. Steven Johnson), and a table of items being sold. The table has columns for Line, Item No., Serial No., Size, Qty, Sell Price, and Ext'd Sell. Below the table are summary fields for Sales Tax, Shipping, Item Total, Total Other, and Grand Total. The Grand Total is \$4,054.50.

The GEMINI® Sales screen is easy to use and easy on the eyes.

Attractive Main Menu shows your Store Name and Logo front and center.

Each security group can have its own button setup, that you can configure.

Buttons can also launch external programs, link to websites, or open documents.

- Easily search or enter **customers** on the fly.
- Manage **special orders, repairs, layaways, credits.**
